**HERE'S WHY
MATHEWS HYDRANTS
ARE BEST IN SERVICE**

- 1** All working parts contained in replaceable barrel—saves valuable time.
- 2** Hydrant victim of traffic accident can be replaced without excavating.
- 3** Valve opens *against* water pressure — no leakage or flooding when broken.
- 4** Stuffing box plate cast integral with nozzle section, eliminating a joint and gasket, protects hydrant stem against rust and sediment.
- 5** Only one part—the revolving nut—needs lubrication. Can be done at the time of your regular fall and spring inspection.
- 6** Available with mechanical-joint pipe connections.

**MATHEWS
HYDRANTS**

AMERICAN WATER WORKS ASSOCIATION, INC.
521 Fifth Avenue  **New York 17, N.Y.**

This Directory is not for sale. It is distributed to members of all grades for their use as members of the Association and is not to be placed in the hands of any nonmembers to be used as the basis of personal or mail promotion or solicitation.

Officers of the Association and its Sections or Divisions may obtain addressed labels from the membership list without charge if the application for such list is made in writing by the person requesting it and the use to which the name list is to be put is clearly stated and shown to be in conformance with the conditions laid down in the paragraph above.

Any member of the Association may purchase a set of addressed labels or cards by depositing with the Secretary an amount designated by him to cover labor and material, and by recording the exact use to be made of the list. If the designated use to which the list is to be put is not in accord with the intent of the first paragraph herein, the Secretary will not make the list available to the applicant.

This 1954 edition of the AWWA Directory contains the membership list, corrected through July 1, 1954, and a brief directory of committees. In accordance with the policy of annual publication, another Directory will be published in 1955, and will contain a list of new members for the intervening year, as well as such editorial material as a water works buyers' guide, procedural and historical information about AWWA, and other features. The next full membership list will appear in the succeeding Directory, in 1956, and the two Directory sections will appear in alternate years thereafter—the membership lists in even-numbered years; the other reference matter in the odd years.

There's no substitute for CONCRETE and STEEL!

**LOCK JOINT
combines
these materials
to make
the ideal pipe!**

Placing outside form, prior to pouring concrete, around steel reinforcing cage of Lock Joint Reinforced Concrete Pressure Pipe.

CONCRETE, with its proven qualities of durability, non-corrosion, resistance to electrolytic action, and high compression strength is combined, by Lock Joint, with steel's toughness, resilience and high tensile strength to make a pipe that retains the best qualities of both—non tuberculance, high structural strength and long life with little or no maintenance. Dense concrete affords complete protection for the quality

reinforcing steel. Both materials are carefully calculated to meet your pressure needs with a wide factor of safety. The Lock Joint Pipe Company's Rubber and Steel Joint is extremely watertight and, at the same time, flexible.

For superior strength, carrying characteristics and trouble-free operation, let Lock Joint supply your pipe needs in sizes 16" and larger.

LOCK JOINT PIPE COMPANY

Established 1905

P. O. Box 269, East Orange, N. J.

PRESSURE PIPE PLANTS: Wharton, N. J., Turner, Kan., Detroit, Mich., Columbia, S. C.

SEWER & CULVERT PIPE PLANTS:

Casper, Wyo. • Cheyenne, Wyo. • Denver, Col. • Kansas City, Mo. • Kennett Square, Pa. • Valley Park, Mo. • Chicago, Ill. • Rock Island, Ill. • Wichita, Kan. • Kentworth, N. J. • Hartford, Conn. • North Haven, Conn. • Tucumcari, N. Mex. • Oklahoma City, Okla. • Tulsa, Okla. • Beloit, Wis. • Hato Rey, P. R. • Ponce, P. R. • Caracas, Venezuela • Wholly Owned Subsidiary, Great Lakes Pipe Co., Plants: Buffalo, N. Y. • W. Henrietta, N. Y.

SCOPE OF SERVICES—Lock Joint Pipe Company specializes in the manufacture and installation of Reinforced Concrete Pressure Pipe for Water Supply and Distribution Mains 16" in diameter or larger, as well as Concrete Pipes of all types for Sanitary Sewers, Storm Drains, Culverts and Subaqueous Lines.

INTRODUCTION

THE American Water Works Association was organized in 1881 to "advance the knowledge of the design, construction, operation and management of water works." Its activities in part are developed through regional or state Sections, in part through general Divisions, in part through technical committees and in part through its monthly JOURNAL.

There are at present 30 regional or state Sections. The largest ones are in California, the Southwest, and New York. Each Section has at least one meeting each year with attendance totals ranging from 100 to more than 1,500 interested persons. Papers are presented; round table discussions are held; tests are made; at a few, manufacturers' products are exhibited—all designed to improve water works design and management in the Section area.

There are four professional Divisions of the Association: Management; Water Resources; Water Purification; and Transmission and Distribution. The programs at the Annual Conferences of the Association are built around the activities of these Divisions.

The technical work of the Association is organized under the Committee on Water Works Practice and the Committee on Water Works Administration. These are groups of men selected to provide a cross section of the Association's field of interest, in the persons of leaders in the field. No technical pronouncements in the name of the Association are made until they are accepted by these committees and approved by the Board of Directors.

The Board of Directors has also established certain special committees to deal in fields of Association policy. At present such committees include "General Policy," "National Water Policy," and committees on short courses and certification and also research needs.

The JOURNAL AWWA is a monthly publication which totals approximately 2,500 pages per year. In it are found the papers and reports on water works subjects deemed to have permanent or major value to the field. About 150 pages annually are given over to abstracts of articles the world over which relate to all aspects of water works affairs. No comparable cross section of data exists elsewhere. An Index of Association publications for the years 1881 to 1939 and an Index to the JOURNAL for the years 1940-1944 are available. A 1940-1954 Index is in preparation. In addition, a detailed index to each annual volume of the JOURNAL appears in the December issue.

Another publication distributed to AWWA members is WILLING WATER, a bimonthly bulletin devoted to public relations, safety, defense, and other special problems.

The Association maintains headquarters at 521 Fifth Avenue, New York 17, N.Y., with a full-time staff of thirteen persons available for conference or correspondence on matters of general water works interest.

LOCAL SECTIONS

There have been established 30 Local Sections, under the provisions of Article VII of the Association's By-Laws. Each of these Sections consists of the Association members who reside in the territory embraced by that Section. A tabulation of the Sections, the states they include, and the membership total for each, is given on page 4a.

Each Local Section has its own officers, as listed each month in the JOURNAL. These officers are all selected by the Section itself under the provisions of the By-Laws of that Section. One of these officers is a member selected to represent his Section on the Board of Directors of the American Water Works Association, in accordance with Articles III and IV of the Association's Constitution.

The Local Sections each hold one or more meetings during the year, their practice in this respect, as well as the conduct of all of their business, being adapted to meet best the needs of their respective territories. Papers presented at the Local Section meetings are drawn upon for publication in the JOURNAL of the Association, as are also the papers presented at the Annual Convention of the Association.

Many of the Association's Sections sponsor water works schools (conferences or in-service training institutes) and several cooperate in the state procedure for licensing operators of water treatment plants.

Each member and affiliate of AWWA is automatically a member of the Section in which he resides.

NATIONAL DIVISIONS

In accordance with the provisions of Article VII of the Association's By-Laws, the Board of Directors has established four national Divisions consisting of groups of the members who are particularly interested in certain branches of the water supply industry.

Water Works Management Division. The Water Works Management Division was organized in 1948 to supersede the Plant Management and Operation Division (organized in 1924) and the Finance and Accounting Division (organized in 1929). The new Division combines the functions of both, taking as its specific fields of interest the financing, management, commercial practices and accounting procedures of water works. Additions to knowledge and the improvement of practices within these fields are the objectives of the Division.

Water Resources Division. The conservation and orderly development of both surface and ground waters, and the control of water pollution as it affects the economics of water supply, are the field of interest of the Water Resources Division. The Division was organized in 1948.

Water Purification Division: This Division was organized originally as the Chemical and Bacteriological Section in 1913. The present name was adopted in 1925. The objects of this Division in particular are: the advancement of the science and art of water purification; the stimulation of research in the physical, chemical and bacteriological fields, especially on the causes and effects of pollution and methods of purification; and the promotion of progress in the design, construction and operation of water purification works.

Distribution Division. The scope of the Distribution Division, which was organized in 1952, includes design, construction, operation, and maintenance activities in the fields of power, pumping, transmission, distribution, customer services, and metering of public water supply.

Any Active or Junior Member or Affiliate of the American Water Works Association may become a member of any one or more of these Divisions upon request, and with no further dues. The principal activities of the Divisions take place during the Annual Convention of the Association, at which time a number of the technical sessions are held under the auspices of the Divisions. These sessions are presided over by the officers of the Division concerned and the subjects of discussion are those in which the Division is interested. The Divisions may also appoint committees for study, research and report upon subjects of interest to them. These committees act under the general supervision of the Association's standing Committees on Water Works Practice or Water Works Administration, if they have as their object the development of standards, specifications, or manuals. If the committees are set up for the compilation of related facts and routine practices within the field of interest of the Division, the Committees on Water Works Practice and Water Works Administration exercise no supervision.

1879—ROSS—1879

Automatic Valves

ALTITUDE VALVE

Controls elevation of water in tanks, basins and reservoirs

1. Single Acting
2. Double Acting

Maintains safe operating pressures for conduits, distribution and pump discharge

SURGE-RELIEF VALVE

REDUCING VALVE

Maintains desired discharge pressure regardless of change in rate of flow

Regulates pressure in gravity and pump systems; between reservoirs and zones of different pressures, etc.

A self contained unit with three or more automatic controls

COMBINATION VALVE

Combination automatic control both directions through the valve.

FLOAT VALVE

Maintains levels in tank, reservoir or basin

1. As direct acting
2. Pilot operated and with float traveling between two stops, for upper and lower limit of water elevation.

Electric remote control—solenoid or motor can be furnished

REMOTE CONTROL VALVE

Adapted for use as primary or secondary control on any of the hydraulically controlled or operated valves.

Packing Replacements for all Ross Valves Through Top of Valve

ROSS VALVE MFG. CO., INC., P. O. BOX 593, TROY, N.Y.

NATIONAL KNOW-HOW PAYS!

National knows how to work quickly reducing supplementary labor costs and service interruptions.

National knows how to clean the difficult jobs, including hard incrustations, unusual obstructions and pipes of unusually large or small diameter.

National knows how to clean long runs with a minimum number of pipe entries.

National knows how to avoid trouble, such as can occur from improper provision for drainage of flush water from large mains or from the use of excessive pressures.

National knows how to clean so thoroughly that restoration of 95% of the original pipe capacity is guaranteed.

National Know-How comes from over 40 years of experience cleaning water mains.

Write or call today for information and prices.

Armco Steel Water Pipe Reference Data

In Tuscaloosa, Alabama, this 50-ft. length of Armco Steel Water Pipe is being lifted onto concrete piers.

When you need water supply lines and force mains, here is a handy guide to the advantages of Armco Steel Water Pipe.

METHOD OF MANUFACTURE. Armco Steel Pipe meets AWWA Specifications C-201 and C-203. Continuous spiral seam butt weld is as strong as the pipe itself. Pressure test data is available.

SIZES AND LENGTHS. Exact lengths up to 50 feet. Twenty diameters from 6 to 36 inches; ten wall thicknesses from $\frac{3}{4}$ - to $\frac{1}{2}$ -inch.

COATINGS AND LININGS. Spun coatings and linings and outside protective coatings meet AWWA Specifications C-203 and C-204.

FLOW CAPACITY. C=150 to 160. Spun enamel lining assures continuing high flow capacity.

FITTINGS. Standard and special fittings are prefabricated for quick, easy installation.

END FINISH. Pipe ends can be flanged, beveled for field welding, prepared for Dresser couplings, or otherwise finished to meet your needs.

Write for manual "Design Standards for Steel Water Pipe." Armco Drainage & Metal Products, Inc., Welded Pipe Sales Division, 4544 Curtis Street, Middletown, Ohio. Subsidiary of Armco Steel Corporation.

THE A.P. SMITH MFG. CO.

EAST ORANGE, NEW JERSEY

The meters you bought 20 or more years ago were the best you could buy *then*. But today, because of the accomplishments of Rockwell's engineering and research staff, their performance is dated.

Consider the matter of accuracy at low flow rates. Meters of 20 years ago were designed and built to measure only 90% of the flow at $\frac{1}{4}$ gpm. These same meters even when repaired, cannot be expected to exceed this accuracy. New Rockwell meters easily meas-

ure 95% of the $\frac{1}{4}$ gpm flow and can readily be renewed to duplicate this performance.

We believe you owe it to your city or water company to know what's new and better in water meters—and what old out-dated meters are costing you. Let the Rockwell representative show you proof that a carefully planned program of old meter replacement will materially increase your revenue and cut meter maintenance costs so drastically that it will more than pay for itself.

M. B. SKINNER CO.

Repair Clamps and Saddles for Steel and Cast Iron Pipe

South Bend, Ind.

Established 1898

SKINNER-SEAL EMERGENCY PIPE CLAMP

For stopping leaks in water mains or pipe lines—instantly, permanently. The standard pipe repair

the world over. Makes a tremendous saving over the old method of repairing leaks, as one man can apply it in ten minutes' time. Made of malleable iron; hinged along one side, with electro-plated steel bolts on the other. Bolt nuts always accessible from above. A gasket completes the clamp. Comes in both cast iron main and steel pipe sizes. Write for discount. Sizes: $1\frac{1}{2}$ "-12" for both steel and cast iron pipe.

SKINNER-SEAL PIPE LINE CLAMP

The same principle as an Emergency Pipe Clamp, but about double the length. Especially valuable on splits, or cases of extended corrosion. Like the Emergency Pipe Clamp, it is made of malleable iron, is hinged along one side and provided with electro-plated tightening bolts. Tremendously rugged and strong. Economical in first cost and in installation because one man can apply it quickly and easily. An absolutely permanent repair. Write for discount.

Sizes: $\frac{3}{4}$ "-6" C.I. for both steel and cast iron pipe.

SKINNER-SEAL BELL JOINT CLAMP

For stopping bell and spigot leaks permanently, under pressure. The only clamp with the following features: (1) The large soft gasket is completely SEALED—by Monel band at top, by hard gasket tip at rear. (2) Clamp is equipped with patented distortion-proof anchor ring (3) is completely adjustable to all variations in both pipe and bell sizes. (4) is made of malleable iron and equipped with $\frac{3}{4}$ " electro-plated steel bolts.

Sizes: 2" to 42". Net prices. Write for complete schedule.

SKINNER-SEAL SPLIT COUPLING CLAMP

For repairing clean breaks in cast iron pipe. Two malleable iron rings with intermeshing fingers, drawn together by heavy steel bolts, compress a double-taper soft gasket over the break and permanently shut off the leak. Gasket is completely sealed by Monel band at top and by hard gasket tips at the sides. Applied in 10 minutes. Self-adjusting fit.

Sizes: 2'-24".

Cross Section

SKINNER-SEAL SERVICE SADDLE

For water service connections. Made of malleable iron, with its sturdy design and massive bolt, it is a saddle of the utmost simplicity and strength.

The wide hinge and "web" construction centralizes the pressure on the gasket, while the single, large, accessible bolt not only saves time in application, but gives a uniform seating to the gasket that cannot be obtained by strap saddles with their unequal draw. Not to be confused with single strap saddles. True, we use only one bolt, but the construction of this saddle makes it much stronger than the average strap saddle with two or more straps.

WRITE FOR CATALOG SHOWING OTHER CLAMPS AND SADDLES, AND DRILLING EQUIPMENT

FLEXIBLE BOLTED CONNECTION

Savings in joint making time and labor costs, plus leak-proof flexibility, all combine to increase the demand for M & H Gate Valves with Mechanical Joint end connections. M & H Mechanical Joints are made in accordance with A. S. A. standard specifications A21.11, 1952, with glands, gaskets and bolts interchangeable with Standardized Mechanical Joints for cast iron pipe as furnished by all pipe companies who are members of the Cast Iron Pipe Research Association.

This joint uses the stuffing box principle, by which a thick gasket of triangular cross section is compressed into a stuffing box by a bolted follower ring or gland. Mechanical joint making in the field does not require skilled workmen. The joint's flexibility permits deflection in any direction, longitudinal expansion or contraction without leakage.

Mechanical Joint ends are available on all types of M & H Gate Valves, manufactured in accordance with American Water Works Association specifications, sizes 2 to 36 inches. For complete information, write or wire M & H VALVE AND FITTINGS COMPANY, Anniston, Alabama.

FIRE PROTECTION

The list beginning on the facing page includes AWWA members of all grades—Honorary, Life, Active, Corporate, Associate and Junior—and also the Affiliates and the Municipal Service Subscribers. A geographic breakdown of the membership is given beginning on page 164.

The date when the member first joined the Association is cited in each listing. Active and Life Members are designated only by the date; for example: (July '39). Corporate, Associate, and Junior Members are shown in the following manner: (Corp. M. July '39), (Assoc. M. July '39), (Jr. M. July '39). Affiliates and Municipal Service Subscribers are shown by: (Affil. July '39) and (Munic. Sv. Sub. July '39).

National offices held by members are cited according to the years of the conventions during which the members served. Thus, for example, a member taking office the last day of the 1948 convention and serving until the last day of the 1949 conference will be listed as "*Vice-Pres. '49.*" Awards and Honorary Memberships are shown by the year of the convention at which they were presented. Members enrolled in one or more of the Association's four Divisions—Water Works Management Division, Water Resources Division, Water Purification Division, and Distribution Division—are designated by *M*, *R*, *P*, and *D*, respectively.

CONSOLIDATED LIST OF MEMBERS

Members registered in the Water Works Management Division are indicated by "M"; in the Water Resources Division by "R"; in the Water Purification Division by "P"; and in the Transmission and Distribution Division by "D."

DIRECTORY OF COMMITTEES

As of August 1, 1954

CONTENTS

I. Committee of the Board	191	III. Water Works Practice	193
Executive.....	191	E2—Water Resources (WRD).....	193
General Policy.....	191	E2.1—Committee on Committees (WRD).....	193
Finance.....	191	E2.A—Weather Control (WRD).....	193
Administrative Com. for Employee's Pension System.....	191	E2.B—Production of Usable Water From Salt Water.....	193
Publication.....	191	E3.A—Watershed Protection and Erosion Control (WRD).....	193
Constitution and By-Laws.....	191	E3.B—Public Use of Watershed Areas (WRD).....	193
Honorary Membership.....	191	E4—Ground Water (WRD).....	193
John M. Diven Memorial Medal.....	191	E4.A—Deep Wells (WRD).....	193
John M. Goodell Prize.....	191	E4.B—Artificial Ground Water Recharge (WRD).....	193
Convention Place.....	191	E4.C—Underground Waste Disposal and Control (WRD).....	193
Convention Management—1955.....	191	E5—Water Purification (WPD).....	193
National Water Policy.....	191	E5.A—Water Purification Development (WPD).....	193
Uniformity of Grading, Registration, and Short Courses.....	191	E5.B—Manual of Water Quality and Treatment (WPD).....	193
Water Works Research Needs.....	191	E5.B1—Revision, Chapter on Aeration (WPD).....	193
Advisory Committees on Research Studies of National Institutes of Health.....	191	E5.B2—Revision, Chapter on Mixing, Flocculation, Settling (WPD).....	193
Effect of Purification Methods on Water Main Carrying Capacities.....	191	E5.B3—Revision, Chapter on Filtration (WPD).....	193
Chromium and Cadmium Solubility and Toxicity.....	192	E5.1—Specifications and Tests for Water Purification Chemicals (WPD).....	194
II. Water Works Administration	192	E5.2—Water Conditioning and Prevention of Corrosion and Incrustation.....	194
A1—Organization and Administrative Policy (WMD).....	192	E5.3—Standard Methods for the Examination of Water and Sewage (WPD).....	194
A1.A—Constitutional and Statutory Aspects of Municipal Water Works Organization (WMD).....	192	E5.4—Fluoridation Materials and Methods (WPD).....	194
A1.B—Radio and Mobile Communication Facilities for Water Works (WMD).....	192	E5.5—Instrumentation and Methods of Testing Radioactive Contamination in Water (WPD).....	194
A1.C—Water Use in Air Conditioning and Other Refrigeration (WMD).....	192	E5.6—Molecular Filter Membranes (WPD).....	194
A1.D—Water Use in Fire Prevention and Protection (WMD).....	192	E5.7—Survey of State Regulations on Water Treatment Plant Design (WPD).....	194
A1.E—Taxation and Revenue Allocation (WMD).....	192	E5.8—Effects of Synthetic Detergents on Water Supplies (WPD).....	194
A2—Public and Worker Relationships (WMD).....	192	E5.8.1—Analytical Methods for Detergents.....	194
A2.A—Public Relations (WMD).....	192	E5.9—Specifications for Liquid Chlorine (WPD).....	194
A2.B—Management Relations (WMD).....	192	E5.10—Biological Infestation of Purified Water (WPD).....	194
A2.C—Compensation of Water Works Personnel (WMD).....	192	E6.A—Water Hammer (WDD).....	194
A2.D—Pension and Retirement Plans (WMD).....	192	E7.1—Study of Breaks in Water Distribution Systems (WDD).....	194
A2.E—Safety Practices (WMD).....	192	E7.A—Steel Pipe.....	194
A2.E1—Supply.....	192	E7.B—Reinforced Concrete Pipe.....	194
A2.E2—Treatment and Pumping.....	192	E7.D—Laying Cast-Iron Pipe.....	194
A2.E3—Distribution.....	192	E7.D1—Mechanical Standards for Laying Cast-Iron Water Mains.....	194
A2.E4—Administration.....	192	E7.D2—Procedure for Disinfecting Water Mains.....	194
A2.F—Job Classifications (WMD).....	192	E7.E—Asbestos-Cement Pipe.....	194
A3—Financing (WMD).....	192	E7.F1—Valves.....	195
A3.A—Construction, Equipment, and Materials Contracts (WMD).....	192	E7.F1.1—Butterfly Valves.....	195

Membership of Committees

As of August 1, 1954

The committees listed are those which have been appointed for the calendar year 1954 or for the Association year 1954-55. The President and Vice-President are ex-officio members of all Association committees, but are listed by name in committees to which they were appointed as individuals, before becoming

officials of the Association. The initials WMD, WPD, WRD, or WDD following the name of a committee indicate that it operates in the field of interest of the Water Works Management Division, the Water Purification Division, the Water Resources Division, or the Water Distribution Division, respectively.

I. COMMITTEES OF THE BOARD

Executive

D. L. MAFFITT, <i>Chmn.</i>	M. B. CUNNINGHAM
F. C. AMSDARY JR.	H. F. O'BRIEN
W. W. BRUSH	H. E. JORDAN, <i>Ex Officio</i>

General Policy

<i>Representatives of AWWA</i>	
M. B. CUNNINGHAM, <i>Chmn.</i>	
A. E. BERRY	D. L. MAFFITT
C. H. CAPEN	W. V. WEIR
<i>Representatives of WSWMA</i>	
H. F. O'BRIEN	W. J. ORCHARD

Finance

W. J. ORCHARD, <i>Chmn.</i>	<i>Ex officio</i>
C. J. ALFKE	W. W. BRUSH
REEVES NEWSOM	H. E. JORDAN

Administrative Com. for Employees' Pension System

REEVES NEWSOM, <i>Chmn.</i>	W. W. BRUSH, <i>Treas.</i>
C. J. ALFKE	E. F. JOHNSON, <i>Secy.</i>

Publication

RICHARD HAZEN, <i>Chmn.</i>	H. E. JORDAN, <i>Ex officio</i>
M. K. SOCHA, <i>Chmn. WDD</i>	WILLIAM YEGEN, <i>Chmn. WPD</i>

AMERICAN WATER WORKS ASSOCIATION

PUBLICATIONS

Effective October 1, 1954

Orders should be sent to the American Water Works Association, Inc., 521 Fifth Ave., New York 17, N.Y. Payment is required in advance, in U.S. funds, from nonmembers.

BOOKS

Index to Proceedings & Journal AWWA (1881-1939)—This cloth-bound, 285-p. index covers the Proceedings for 1881-1913 and the JOURNAL for 1914-1939. Price, for general sales, \$2.00; to members paying in advance, \$1.60.

Index to Journal AWWA, 1940-1944—Paper-bound supplement to *Index to Proceedings and Journal AWWA*. 64 pp. March 1945. Paper bound. Price, for general sales, \$1.00; to members paying in advance, 80¢.

Manual of Water Works Accounting—Prepared jointly by the AWWA and the Municipal Finance Officers Association, this 500-page Manual contains twenty chapters covering all utility accounting practices. 1938; 2nd printing, 1951. Price, for general sales, \$4.00; to members paying in advance, \$3.20.

The Quest for Pure Water—By M. N. Baker. A history of water purification from the earliest records to the 20th century. 73 illustrations, 900 references, 527 pp. 1948; 2nd printing, 1949. Price, for general sales, \$5.00; to members paying in advance, \$4.00.

Standard Methods for the Examination of Water and Sewage—Published jointly by

the AWWA and the American Public Health Association. Cloth bound, 300 pages. Ninth edition, 1946. Available through the American Public Health Association, 1790 Broadway, New York 19, N.Y., at \$4.00, net.

Survival and Retirement Experience With Water Works Facilities—Prepared by a joint committee of the AWWA and the Institute of Water Supply Utilities. Includes reports published in installments in JOURNAL, 1945-46, with additional material and summary tables. Cloth bound, 566 pp. 1947. Price, for general sales, \$3.00; to members paying in advance, \$2.40.

Water Quality and Treatment—A manual prepared by AWWA. A comprehensive survey of water quality standards and procedures for purification, softening and other conditioning. Completely revised and enlarged second edition. 451 pp. 1950; 2nd printing, 1951. Price, for general sales, \$5.00; to members paying in advance, \$4.00.

Water Rates Manual—A report of the AWWA Committee on Water Rates, as published in the March 1954 JOURNAL, plus valuable supplementary data. Paper bound, 64 pp. 1954. \$1.00, net.

PERIODICALS AND PAMPHLETS

Journal American Water Works Association. A monthly magazine of technical papers, discussions, news and reports. Issued quarterly from 1914 to 1919; bi-monthly from 1920 to September 1924; monthly ever since. Annual indexes are contained in the December issue of each year from 1940 on. Cumulative indexes of authors and articles grouped by topics are described on p. 1. Subscriptions to individuals only in conjunction with AWWA membership in U.S., Canada, and Cuba; to others, and elsewhere, \$8.00 per year. Single copy price (issues dated 1954 and later), 85¢; 60¢ to AWWA members. For issues dated 1925-1953, 75¢; to members, 50¢.

The Story of Water Supply. A pictorial presentation designed to acquaint the junior high school student with the history, accomplishments, and workings of public

water supplies. Entertaining; instructive. 16 pp., il., 15¢ (quantity prices on request).

What Price Water? A brochure planned for the layman to explain expenditures for water utility operations and services. 14 pp., il., 25¢. (Quantity rates on request.)

Willing Water. A bimonthly bulletin devoted to public relations, safety, defense, and other special problems. Usually 10¢.

Willing Water Cartoons. A catalog of the *Willing Water* cartoon illustrations available in electrotone or newspaper mat form, for use in printing and advertising work. No charge.

Your Water Supply. A conservation guide designed as an envelope stuffer for quantity distribution. Includes "how-to" information on reading meters, detecting leaks, replacing faucet washers, saving water generally. 12 pp., il., no charge for single copies (quantity rates on request).

JOURNAL REPRINTS

Order by title and number, not by topic. Copies of Journal articles not available in reprint form can generally be obtained by ordering a copy of the issue in which they were published; for terms, see "Journal AWWA" in preceding "Periodicals and Pamphlets" section.

Air Conditioning. No. 263. Committee Report: Regulation of Air Conditioning and Other Refrigeration. From December 1950 JOURNAL. 9 pp., 20¢.

Analysis. No. 341. Task Group Report: Technique of Bacterial Examination of Water With Molecular Filter Membranes. From November 1953 JOURNAL. 15 pp., 25¢.

Annual Reports. No. 246. Committee Report: Water Department Annual Reports. Includes a guide to the preparation of an annual statistical report. From August 1950 JOURNAL. 14 pp., 20¢.

Consumption. No. 221. W. B. Langbein: Municipal Water Use in the United States. From November 1949 JOURNAL. 5 pp., 15¢.

Consumption. No. 280. Roy R. Green: Water Use in Industry. From August 1951 JOURNAL. 12 pp., 20¢.

Extensions. No. 323. Committee Reports: Water Service for Suburban Areas (from

July 1953 JOURNAL), and Water Main Extension Policy (from August 1949). 39 pp., 65¢.

Fluoridation. No. 320. W. W. Land & E. K. Mosenthal. Court Decisions on Municipal Water Fluoridation. From April 1953 JOURNAL. 10 pp., 25¢.

Grounding. No. 270. AWWA Policy Statement: Grounding of Electric Circuits on Water Pipe. Also C. F. Meyerherm: Water Works Industry's Attitude on Grounding and Stray Current Problems. From April 1944 and December 1945 JOURNALS. 4 pp., 10¢.

Pension Legislation. No. 254. Committee Report: State Pension and Retirement Legislation in 1949. From October 1950 JOURNAL. 8 pp., 15¢.

Rates. No. 256. L. E. Ayres: Basic Considerations in Determining Water Rates. From November 1950 JOURNAL. 22 pp., 25¢.

Regulations. No. 269. California Section Report: Tentative Regulations Governing Water Service. From April 1951 JOURNAL. 14 pp., 20¢.

Resources. No. 278. Morris, Wolman, Pirnie and others. A series of reviews of the President's Water Resources Policy Commission Report. From June 1951 JOURNAL. 32 pp., 30¢.

Safety. No. 339. Task Group Report: A Safety Program for the Water Works Industry. From September 1953 JOURNAL. 19 pp., 30¢.

Statistics. A Survey of Operating Data for Water Works in 1950. From June 1953 JOURNAL. No. 322, 96 pp., 60¢. In combination with statistical analysis by Seidel et al. from December 1953 JOURNAL. No. 345, 122 pp., \$1.00.

Treatment. No. 268. Committee Report: Capacity and Loadings of Suspended Solids Contact Units. From April 1951 JOURNAL. 29 pp., 30¢.

Writing. No. 271. A Style Manual for Journal Authors. From the May 1947 JOURNAL. 16 pp., 20¢.

AWWA STANDARDS

A—Source

AWWA A100-46 (formerly 4A.1-1946)—Standard Specifications for Deep Wells. Approved as Tentative on April 30, 1945,

and published in the September 1945 JOURNAL. Made Standard on May 10, 1946; revised June 18, 1952. 54 p., 65¢.

B—Treatment

B100—Filtration

AWWA B100-50 (formerly 5C-1950)—Standard Specifications for Filtering Material. Revision of 1943 document approved as Tentative Nov. 15, 1948, and published in the March 1949 JOURNAL. Made Standard Jan. 16, 1950. 16 pp., 25¢.

B200—Softening

AWWA B200-53 (formerly 5W1.01)—Standard Specifications for Sodium Chloride. Approved as Tentative July 6, 1949, and published in the March 1950 JOURNAL. Made Standard May 15, 1953. 10 pp., 25¢.

AWWA B201-53—Standard Specifications for Soda Ash. Approved as Tentative Oct. 15, 1951, and published in the February 1952 JOURNAL. Made Standard May 15, 1953. 6 pp., 20¢.

AWWA B202-54—Standard Specifications for Quicklime and Hydrated Lime. Approved as Tentative September 9, 1952, and published in the January 1953 JOURNAL. Made Standard May 27, 1954. 14 pp., 25¢.

AWWA B250-51 (formerly 5Z-1951)—Standard Manual of Cation Exchanger Test Procedures. Revision of 1943 document approved as Tentative Dec. 31, 1948, and published in the May 1949 JOURNAL. Made Standard May 4, 1951. 28 pp., 40¢.

B300—Disinfection

AWWA B300-53T—Tentative Standard Specifications for Hypochlorites. Approved as Tentative June 2, 1953, and published in the October 1953 JOURNAL. 6 pp., 20¢.

B400—Coagulation

AWWA B400-53 (formerly 5W1.10)—Standard Specifications for Ammonium Sulfate. Approved as Tentative July 15, 1949, and published in the November 1950 JOURNAL. Made Standard May 15, 1953. 7 pp., 20¢.

AWWA B401-53 (formerly 5W1.30)—Standard Specifications for Bauxite. Approved as Tentative Apr. 28, 1950, and published in the July 1950 JOURNAL. Made Standard May 15, 1953. 8 pp., 20¢.

AWWA B402-53 (formerly 5W1.31)—Standard Specifications for Ferrous Sulfate. Approved as Tentative May 31, 1949, and published in the October 1950 JOURNAL. Made Standard May 15, 1953. 7 pp., 20¢.

AWWA B403-54—Standard Specifications for Aluminum Sulfate. Approved as Tentative Aug. 21, 1952, and published in the November 1952 JOURNAL. Made Standard May 27, 1954. 10 pp., 25¢.

B500—Scale and Corrosion Control
AWWA B500-53 (formerly 5W1.60)—
Standard Specifications for Trisodium
Phosphate. Approved as Tentative Apr.
 3, 1950, and published in the June 1950
JOURNAL. Made Standard May 15, 1953.
 6 pp., 20¢.

AWWA B501-53—Standard Specifications
for Caustic Soda. Approved as Tentative
 Oct. 15, 1951, and published in the De-
 cember 1951 *JOURNAL*. Made Standard
 May 15, 1953. 6 pp., 20¢.

B600—Taste and Odor Control
AWWA B600-53 (formerly 5W1.70)—
Standard Specifications for Powdered
Activated Carbon. Approved as Tenta-
 tive July 11, 1949, and published in the
 February 1951 *JOURNAL*. Made Standard
 May 15, 1953. 14 pp., 25¢.

AWWA B601-53T—Tentative Standard
Specifications for Sodium Pyrosulfite.

Approved as Tentative Dec. 18, 1953, and
 published in the January 1954 *JOURNAL*.
 5 pp., 20¢.

B700—Prophylaxis

AWWA B700-49—The Fluoridation of
Public Water Supplies. A statement of
 recommended policy and procedure ap-
 proved on May 29, 1949, and published in
 the July 1949 *JOURNAL*. 5 pp., 20¢.

AWWA B701-54 (formerly 5W1.90-T-
 1950)—**Standard Specifications for So-**
dium Fluoride. Approved as Tentative
 July 21, 1950, and published in the Sep-
 tember 1950 *JOURNAL*. Made Standard
 May 27, 1954. 7 pp., 20¢.

AWWA B702-54T—Tentative Standard
Specifications for Sodium Silicofluoride.
 Approved as Tentative May 27, 1954, and
 published in the August 1954 *JOURNAL*.
 6 pp., 20¢.

C—Distribution

C100—Cast-Iron Pipe, Fittings
AWWA C100-52T (formerly 7C.1-1908)
 —**Tentative Standard Specifications for**
Cast-Iron Pressure Fittings. The "spe-
 cial castings" portion of the original 1908
 specifications for cast-iron pipe and cast-
 ings; still valid for replacing old fittings,
 but superseded by various American Stand-
 ards (which follow) for new installations.
 Latest revision, Dec. 31, 1952, published in
 the March 1953 *JOURNAL*. 28 pp., 55¢.

AWWA C101-39 * (ASA A21.1-1939)—
American Recommended Practice Man-
ual for the Computation of Strength
and Thickness of Cast-Iron Pipe. Adopted by AWWA and the American
 Standards Assn. December 1939 and pub-
 lished in the December 1939 *JOURNAL*.
 81 pp., 65¢.

AWWA C102-53 * (ASA A21.2-1953)—
American Standard Specifications for
Cast-Iron Pit-Cast Pipe for Water or
Other Liquids. Adopted by AWWA
 and the American Standards Assn. De-
 cember 1939 and published in the Decem-
 ber 1939 *JOURNAL*. Latest revision Jan.
 13, 1953. 23 pp., 45¢.

AWWA C104-53 * (ASA A21.4-1953)—
American Standard Specifications for
Cement-Mortar Lining for Cast-Iron

Pipe and Fittings. Adopted by AWWA
 and the American Standards Assn. De-
 cember 1939 and published in the December
 1939 *JOURNAL*. Latest revision, Jan. 13,
 1953. 5 pp., 35¢.

AWWA C106-53 * (ASA A21.6-1953)—
American Standard Specifications for
Cast-Iron Pipe Centrifugally Cast in
Metal Molds, for Water or Other
Liquids. Adopted by AWWA and the
 American Standards Assn. Jan. 13, 1953,
 and published in the February 1953 *JOUR-*
NAL. 20 pp., 40¢.

AWWA C108-53 * (ASA A21.8-1953)—
American Standard Specifications for
Cast-Iron Pipe Centrifugally Cast in
Sand-Lined Molds, for Water or Other
Liquids. Adopted by AWWA and the
 American Standards Assn. Jan. 13, 1953,
 and published in the February 1953 *JOUR-*
NAL. 24 pp., 45¢.

AWWA C110-52 * (ASA A21.10-1952)—
American Standard Specifications for
Short-Body Cast-Iron Fittings, 3 Inch
to 12 Inch, for 250-psi Water Pressure
Plus Water Hammer. Adopted by
 AWWA and the American Standards
 Assn. Sept. 30, 1952, and published in the
 November 1952 *JOURNAL*. 10 pp., 35¢.

AWWA C111-53 * (ASA A21.11-1953)—
American Standard Specifications for a
Mechanical Joint for Cast-Iron Pressure
Pipe and Fittings. Adopted by AWWA

* AWWA designations have been assigned mainly
 for indexing purposes. It is expected that the Ameri-
 can Standards Association's "A21" designation will
 normally be used.

and the American Standards Assn. Jan. 13, 1953, and published in the April 1953 JOURNAL. 12 pp., 35¢.

C200—Steel Pipe

AWWA C201-50 (formerly 7A.3-1950)—Standard Specifications for Electric Fusion Welded Steel Water Pipe of Sizes 30 Inches and Over. Published as Tentative in the January 1940 JOURNAL and made Standard Apr. 25, 1940. Latest revision June 21, 1950. 20 pp., 30¢.

AWWA C202-49 (formerly 7A.4-1949)—Standard Specifications for Steel Water Pipe of Sizes up to but Not Including 30 Inches. Published as Tentative Revision of 1941 document in the April 1943 JOURNAL. Made Standard Oct. 3, 1949. Latest revision June 21, 1950. 28 pp., 40¢.

AWWA C203-51 (formerly 7A.5-1950)—Standard Specifications for Coal-Tar Enamel Protective Coatings for Steel Water Pipe of Sizes 30 Inches and Over. Published as Tentative in the January 1940 JOURNAL and made Standard Apr. 25, 1940. Latest revision May 1, 1951. 28 pp. (reprinted under same cover as AWWA C204-50, description of which follows).

AWWA C204-51 (formerly 7A.6-1950)—Standard Specifications for Coal-Tar Enamel Protective Coatings for Steel Water Pipe of Sizes up to but Not Including 30 Inches. Published as Tentative in the January 1940 JOURNAL and made Standard Apr. 25, 1940. Latest revision May 1, 1951. 24 pp. (reprinted under same cover as AWWA C203-50), 60¢.

AWWA C205-41 (formerly 7A.7-1941)—Standard Specifications for Cement-Mortar Protective Coating for Steel Water Pipe of Sizes 30 Inches and Over. Published as Tentative in the January 1940 JOURNAL and made Standard June 26, 1941. *Revision pending.* 16 pp., 25¢.

AWWA C206-50 (formerly 7A.8-1950)—Standard Specifications for Field Welding of Steel Water Pipe Joints. Approved as Tentative Jan. 10, 1946, and published in the March 1946 JOURNAL. Made Standard Nov. 27, 1950. Latest revision Oct. 3, 1949. 12 pp., 25¢.

AWWA C207-52T—Tentative Standard Specifications for Steel Pipe Flanges.

Approved as Tentative May 9, 1952, and published in the October 1952 JOURNAL. Latest revision May 27, 1954. 6 pp., 25¢.

C300—Concrete Pipe

AWWA C300-52 (formerly 7B.1)—Standard Specifications for Reinforced Concrete Water Pipe—Steel Cylinder Type, Not Prestressed. Approved as Tentative Dec. 11, 1947, and published in the March 1948 JOURNAL. Revised and made Standard June 13, 1952. 14 pp., 25¢.

AWWA C301-52 (formerly 7B.2)—Standard Specifications for Reinforced Concrete Water Pipe—Steel Cylinder Type, Prestressed. Approved as Tentative Nov. 21, 1949, and published in the December 1949 JOURNAL. Revised and made Standard June 13, 1952. 16 pp., 25¢.

AWWA C302-53—Standard Specifications for Reinforced Concrete Water Pipe—Noncylinder Type, Not Prestressed. Approved as Tentative Sept. 4, 1951, and published in the October 1951 JOURNAL. Made Standard May 15, 1953. 15 pp., 25¢.

C400—Asbestos-Cement Pipe

AWWA C400-53T—Tentative Standard Specifications for Asbestos-Cement Water Pipe. Approved as Tentative May 15, 1953, and published in the July 1953 JOURNAL. 8 pp., 20¢.

C500—Valves and Hydrants

AWWA C500-52T (formerly 7F.1)—Tentative Standard Specifications for Gate Valves for Ordinary Water Works Service. Revision of 1938 document approved May 9, 1952, and published in the September 1952 JOURNAL. 16 pp., 25¢.

AWWA C501-41T (formerly 7F.2-T-1941)—Tentative Specifications for Sluice Gates. Approved as Tentative June 26, 1941, and published in the October 1941 JOURNAL. 11 pp., 25¢.

AWWA C502-54 (formerly 7F.3)—Standard Specifications for Fire Hydrants for Ordinary Water Works Service. Revision of 1940 document approved Mar. 16, 1953, and published in the May 1953 JOURNAL. Made Standard May 27, 1954. 12 pp. (printed under same cover as C503-37, description of which follows), 25¢.

AWWA C503-37 (formerly 7F.3.1-1937)—Standard Specifications for Uniform Marking of Fire Hydrants. Published as

Tentative in the April 1937 JOURNAL and made Standard June 7, 1937. (Printed under same cover as C502-40).

AWWA C504-54T—Tentative Standard Specifications for Rubber-Seated Butterfly Valves. Approved as Tentative May 27, 1954, and published in the September 1954 JOURNAL. 12 pp., 25¢.

C600—Pipelaying

AWWA C600-49T (formerly 7D.1-T-1949)—Tentative Standard Specifications for Installation of Cast-Iron Water Mains. Revision of 1938 document approved as Tentative June 3, 1949, and published in the December 1949 JOURNAL. 33 pp., 50¢.

AWWA C601-54 (formerly 7D.2)—A Standard Procedure for Disinfecting Water Mains. Revision of 1947 document approved as Tentative Mar. 6, 1953, and published in the August 1953 JOURNAL. Reprinted together with commentary, "Revised Main Disinfection Procedure," by Marshall P. Crabill. Made Standard May 27, 1954. 12 pp., 25¢.

C700—Meters

AWWA C700-46 (formerly 7M.1-1946)—Standard Specifications for Cold Water Meters—Displacement Type. Published as Tentative in the December 1941 JOURNAL and made Standard May 10, 1946. 12 pp., 25¢.

AWWA C701-47 (formerly 7M.2-1947)—Standard Specifications for Cold Water Meters—Current Type. Published as Tentative in the April 1946 JOURNAL and made Standard July 25, 1947. 12 pp., 25¢.

AWWA C702-47 (formerly 7M.3-1947)—Standard Specifications for Cold Water

Meters—Compound Type. Published as Tentative in the April 1946 JOURNAL and made Standard July 25, 1947. 11 pp., 25¢.

AWWA C703-49 (formerly 7M.4-1949)—Standard Specifications for Cold Water Meters—Fire Service Type. Published as Tentative in the February 1947 JOURNAL and made Standard Jan. 18, 1949. 12 pp., 25¢.

AWWA C704-50 (formerly 7M.5-1950)—Standard Specifications for Cold Water Meters—Current Type—Propeller Driven. Approved as Tentative July 21, 1949, and published in the August 1949 JOURNAL. Made Standard May 25, 1950. 12 pp., 25¢.

C800—Service Lines

AWWA C800-48 (formerly 7T.1-1948)—Standard Specifications for Threads for Underground Service Line Fittings. Approved as Tentative July 25, 1947, and published in the October 1947 JOURNAL. Made Standard Sept. 15, 1948. Included under same cover is "Collected Standard Specifications for Service Line Materials," a committee report. 15 pp., 25¢.

C900—Records and General

AWWA C900-40 (formerly 7G.1-1940)—Recommended Practice for Distribution System Records. Approved Jan. 16, 1940, and published in the February 1940 JOURNAL. Included under same cover are reprints of "Economies in Office Forms" by Israel Rafkind and "Coordinating Operating System Records With Accounting Records" by Nathan B. Jacobs. 52 pp., 60¢.

D—Storage

AWWA D100-52 (formerly 7H.1)—Standard Specifications for Steel Tanks, Standpipes, Reservoirs, and Elevated Tanks, for Water Storage. Revision of 1948 document approved May 9, 1952. Combined with AWWA D102, description of which appears below, in a single booklet. 64 pp., 70¢.

AWWA D101-53 (formerly 7H.2)—Recommended Practice for Inspecting and Repairing Steel Tanks, Standpipes, Reservoirs, and Elevated Tanks, for Water Storage. Revision of 1949 document ap-

proved May 9, 1952. Combined with AWWA D102, description of which appears below, in a single booklet. Made Standard May 15, 1953. 32 pp., 50¢.

AWWA D102-52T—Tentative Recommended Practice for Painting and Repainting Steel Tanks, Standpipes, Reservoirs, and Elevated Tanks, for Water Storage. Approved by AWWA at Tentative May 9, 1952, and published in the August 1952 JOURNAL. Available only in combination with AWWA D100 or AWWA D101, prices of which are given above. Revised May 27, 1954.

ORDER FORM

AWWA Publications

Payment in U.S. funds is required in advance from nonmembers.

American Water Works Association, Inc.
521 Fifth Avenue
New York 17, N.Y.

The publications ordered on the reverse of this sheet should be sent to:

- ☐ I enclose \$_____ in U.S. funds.
- ☐ Charge my AWWA Membership account \$_____ and bill me when shipment is made.

If any of the items ordered are out of print, please:

- ☐ Cancel that portion of my order and return any surplus funds.
- ☐ Place my order on file and fill as soon as possible.

(Money will be refunded on all orders which it may not be possible to fill within a reasonable time—approximately three months.)

(Signature) _____

Quantity Discounts

A discount of 15% applies to purchases of 25 or more copies of any one standard. Orders for 100 or more copies must generally be printed to order, at correspondingly greater discounts—quotations will be supplied on request. Approximately six to eight weeks are required for reprinting.

(over)

Fill in your order in the spaces provided below and on the reverse of this sheet.

A cubic inch of AQUA NUCCHAR—activated carbon—has a surface area of 20,000 square yards—that is, yards and yards of adsorptive quality! In addition, AQUA NUCCHAR is specifically manufactured in a degree of lightness that enables it to remain in suspension, thereby prolonging its purification work. INDUSTRIAL'S Technicians, as part of their regular services, and *without obligating you*, will run an odor survey of your plant to determine when and how AQUA NUCCHAR may be most efficiently applied in your present system.

AQUA NUCCHAR—activated carbon—is the *established* product for achieving water which will be agreeable to the senses of taste and smell. INDUSTRIAL'S Technical Service Department will work with you to determine how—with AQUA NUCCHAR—you may rapidly and efficiently obtain the most palatable water.

AN INTEGRATED PRODUCER IS A SUPPLIER YOU CAN RELY UPON

United States Pipe and Foundry Company is a wholly integrated producer of cast iron pressure pipe—from our mines and blast furnaces to our strategically located pipe plants.

This should be of major interest to a pipe buyer since it means: (1) complete independence of action in supplying your needs as we produce our own raw materials, (2) greater assurance of continuity of service at all times, and (3) undivided control of quality at every step in pipe production from the ground up.

In addition to being able to control the quality of pipe-making raw materials at their sources, our Quality Control of pipe production gives further assurance to customers that the quality level of U. S. Cast Iron Pipe is in excess of standard specifications. Our pipe is produced to *our own* quality control specifications, more exacting than the established specifications under which cast iron pipe is normally purchased.

NOW DEPENDABLE CHLORINATION

plus

Since 1913, Wallace & Tiernan has consistently offered the best in chlorination and chlorination equipment.

Now . . . the new A-701, first of the W & T "700" series of chlorinators, and the most up-to-date chlorinator available today, offers these **PLUS VALUES** to assure safe and dependable chlorination:

Feed ranges up to 100 to 1 without replacing meters.

Maximum corrosion resistance without sacrifice of structural design.

Linear scale reading of chlorine flow rate.

May be operated by manual control, or automatically by electric, hydraulic, air pressure or air vacuum control.

Feed rates up to 1000 pounds per 24 hours.

For the best in equipment, look for the **PLUS VALUES** that add up to Dependable Chlorination.

You can't afford to forget...

That cast iron pipe lasts over 100 years—

That cast iron pipe is inherently stronger, tougher, uniform in quality—

That cast iron pipe offers low installation costs, plus savings throughout its life because of low maintenance costs—

That cast iron pipe's long life and economy saves millions of tax dollars—

That cast iron pipe is the standard conduit for carrying water underground—

That before you experiment with substitutes in your waterworks system, you should study these facts and recognize the guarantee they offer: only cast iron pipe gives you a *proven record of economy through decades of use!* And experienced city officials have, for over three-quarters of a century, chosen Clow Cast Iron Pipe as the finest made. They know Clow offers consistent high quality, coupled with excellent service and fast delivery. They know *centrifugally cast* Clow Pipe offers longer life, greater economy and that it meets all currently approved specifications now in existence. Write today for complete, factual information.

**6 Reasons why
WALKING BEAM
FLOCCULATION
is now specified by
water works engineers**

1. Eliminates troublesome underwater bearings.
2. Eliminates expensive dry well construction.
3. All bearings accessible for inspection and lubrication.
4. Produces quick responsive floc formation.
5. Longer filter runs.
6. A saving in alum.

Write today for Bulletin 451 and a list of water purification plants that have gone modern.

STUART CORPORATION
516 N. CHARLES ST., BALTIMORE 1, MD.

Depend on Cyanamid's ALUM for 6 good reasons

1. It feeds uniformly, without trouble, in solid or liquid form.
2. It has a wide pH range for effective coagulation.
3. It forms floc rapidly.
4. It gives maximum adsorption of suspended and colloidal impurities.
5. It causes minimum corrosion of feeding equipment.
6. It is available in granular form or in the new easy-to-use liquid form.

Write for complete information on Cyanamid's ALUM (Commercial Aluminum Sulfate). Make your next order Cyanamid's ALUM.

QUALITY CONTROL

*MEANS LONGER LIFE
THAN EVER*

For McWANE-PACIFIC

CAST IRON PIPE

McWane-Pacific Cast Iron Pipe will make new records for long life because it is manufactured under a modern Quality Control System. Through every step of the McWane-Pacific manufacturing process, the raw materials first are analyzed, tested and checked, and finally each piece of McWane-Pacific pipe is tested and checked for soundness and strength.

Centuries-of-service records now are being made by cast iron pipe manufactured 100 to 300 years ago without benefit of these modern foundry methods and quality control. It is easy to understand why modern McWane-Pacific pipe will last even longer.

McWane-Pacific Super DeLavaud Cast Iron Pipe is made in 18-foot lengths, bell-and-spigot or mechanical joint, coated, uncoated or cement lined. Wire or write for details. McWANE CAST IRON PIPE COMPANY, Birmingham, Alabama. PACIFIC-STATES CAST IRON PIPE COMPANY, Provo, Utah. (Sales offices in principal cities.)

R FOR CORROSION...

You don't need a specialist to *recognize* Corrosion. But you do need one to treat it successfully. The skill required to achieve complete corrosion control comes only from the knowledge and experience gained through years of practical application.

Recognition of that fact is one reason more and more people are turning to E.R.P. for assistance on corrosion problems—one reason that thousands of buried or submerged steel structures of all types have been successfully protected against corrosion by E.R.P. engineers. Corrosion specialists for over 17 years, these men are highly trained and well equipped to help you with your corrosion problem. Write for full information today.

TRANSITE[®] PRESSURE PIPE

with the NEW

RING-TITE[®] COUPLING

*Goes together fast,
locks tight automatically*

On this Utah Job, snow, ice and difficult conditions caused no installation slowdown.

In this California Installation, flexible Ring-Tite joints permitted easy conformance to curves.

In state after state, contractors are learning that Transite Pressure Pipe and the new Ring-Tite Coupling provide fast, sure pipe line assembly with tight, dependable joints . . . strength to assure lasting, trouble-free water mains through the years.

The design of the Ring-Tite Coupling permits quick, easy alignment. To assemble, rubber rings are simply popped into grooves. Then lubricated pipe ends slide in under the rings smoothly, easily and surely. Pipe ends stop positively—with ends automatically separated within coupling. This separation gives the line flexibility to withstand shock and vibration, relieves line stresses, permits conformance to curves. Installations can be completed under adverse weather, temperature or terrain conditions. No complicated equipment is required.

Transite Pressure Pipe and the Ring-Tite Coupling are made of asbestos and cement. Strong and durable, they cannot rust; are highly resistant to corrosion. Tested to A.W.W.A. specifications.

For the new Ring-Tite folder, write Johns-Manville.

standardize on
MUELLER
 a complete line of
 water works equipment

Low maintenance and high efficiency are characteristic of all Mueller water works equipment, supplies and specialties. Each item is engineered to do its specific job and is manufactured from the finest of materials — guaranteeing long, trouble-free life. A high degree of standardization and interchangeability requires a minimum inventory of replacement parts in case of accident or emergency. Mueller's complete line of products, a few of which are shown, provides a single source for your water works needs. All products are fully tested and warranted.

60

PLUS

More than sixty municipal, or privately-owned, water and gas supply systems, having *cast iron mains in service for a century or more*, are members of the Cast Iron Pipe Century Club.

Although the Club is formally constituted, there are no dues, no regular meetings, and no obligations other than to inform the Recording Secretary if and when the qualifying water or gas main is taken out of service, or, sold for re-use.

If your records show a cast iron main in service, laid a century or more ago, the Club invites you to send for a handsome framed Certificate of Honorary Membership. Address Thomas F. Wolfe, Recording Secretary, Cast Iron Pipe Century Club, Peoples Gas Bldg., Chicago 3, Illinois.

Rensselaer

VALVES AND HYDRANTS

with Mechanical Joint

The surest way to reduce installation costs and insure long service with low maintenance on cast iron pipe lines is to use Rensselaer Valves and Hydrants with Mechanical Joints.

The installation cost is reduced because an unskilled laborer can make the connection in a few minutes with only one wrench.

Low maintenance is assured by the dependability of this type of connection which has been tested and proven in thousands of installations.

Rensselaer Gate Valves are built rugged and simple, to give positive seating action and long life. They are easy to operate, and conform to A.W.W.A. specifications.

Rensselaer Fire Hydrants are designed on the knuckle joint principle and open with the pressure. They are quick opening with free-flow, long radius curves. Will not freeze or flood and no digging is required for repairs or stand-pipe breakage.

SALES REPRESENTATIVES IN PRINCIPAL CITIES

In water treatment problems...

you won't find identical twins

No two water treatment problems are exactly alike. The right solution to each can only be arrived at after a careful study of the local conditions. Variables such as raw water composition, rate of flow and climate required automatically rule out the cut-and-try approach. The installation shown below is a good example of how equipment should be selected to fit the job... and not vice versa.

Aerial view of the Allentown Plant. New additions are in the right foreground... original plant is behind the main building.

Allentown, Pennsylvania

MODERNIZES EXISTING PLANT... ADDS NEW PLANT...

Faced with an expanding population and a badly overloaded water treatment plant, Allentown, Pa. called in Morris Knowles, Inc. of Pittsburgh, Pa. to design treatment facilities for 30 MGD. The Engineers first surveyed the existing facilities and found that effective use could be made of two rectangular plain sedimentation basins. Two Dorco Flocculators, each with three rows of paddles, were installed at the head end of each basin in the twenty-five-year-old 10 MGD plant, thus greatly increasing the efficiency to prepare the water for

settling and filtering. For the additional 20 MGD capacity the Engineers specified two more sets of Dorco Flocculators to operate in combination with two SZ-7 Dorco Square Clarifiers each 110 ft. square. Two Dorco Flash Mixers were also installed as well as additional filter capacity.

If you'd like more information on the complete line of Dorco water treatment equipment, write for Bulletin No. 9141 to The Dorco Company, Stamford, Connecticut, or in Canada, 26 St. Clair Avenue E., Toronto 6.

Every day, nearly 8 billion gallons of water are treated by Dorco equipment.
